1. The following is an examiner's statement of reasons for allowance:

In response to the reversal and remand by the Board of Appeals, the following reasons for allowance is deemed necessary.

The Board suggested a rejection based on the Smith reference, however the Board failed to properly consider the limitation of "a single elastically deformable band". The Examiner assumes that the Board was suggesting that the sidewalls 14 of Smith are equivalent to the band claimed, however Smith clearly states that the sidewalls are made from stiff synthetic rubber (see column 2 lines 30-35) and this material clearly is not considered to be elastically deformable especially when read in view of applicants specification and the necessary function performed by applicants' band. Also, the Board stated that "Smith does not specifically mention the claimed athletic foot covering, such covering appears to be part of a conventional sneaker generally included in Smith". Since the Board stated in the reversal of the Examiners prior rejections that combining conventional shoes with overshoes that the rejection does not provide the claimed limitations of "the sole surface configured in the same perimeter shape and size of the permanent treaded bottom of the athletic foot cover" (see Board Decision page 8, lines 5-14), the Examiner does not find any motivation to do the same modification to the Smith reference.

In response to the Boards suggestion of a rejection based on Adair, it is respectfully noted that such a rejection was made in a prior rejection and applicants' amendments and arguments as to how Adair does not read on the claims is clearly stated in applications response filed 8/26/02.
